

Portfolio Technical Analysis Dashboard

Assignment 6 | Visualization Phase

Student	Samaneh Yarmohammadi
Course	BDA400 Data Science Tools and Techniques
Submission	Yarmohammadi_Samaneh_BDA400_A06

Project overview

This project is an interactive R Shiny dashboard that retrieves historical market data from Yahoo Finance. It supports daily, weekly, and monthly views; line, area, and candlestick charts; configurable SMA, EMA, RSI, and MACD indicators; and moving-average crossover rules that mark Buy and Sell events on the appropriate price bars. The app also includes KPI summaries, recent-signal output, CSV export, and clear input and download error handling.
